

Some Corrections Software has been around so long – it has a life of its own.

During the last 20 years, we have used "Actuarial Risk Prediction" tools to estimate how big our recidivism problem is going to be.

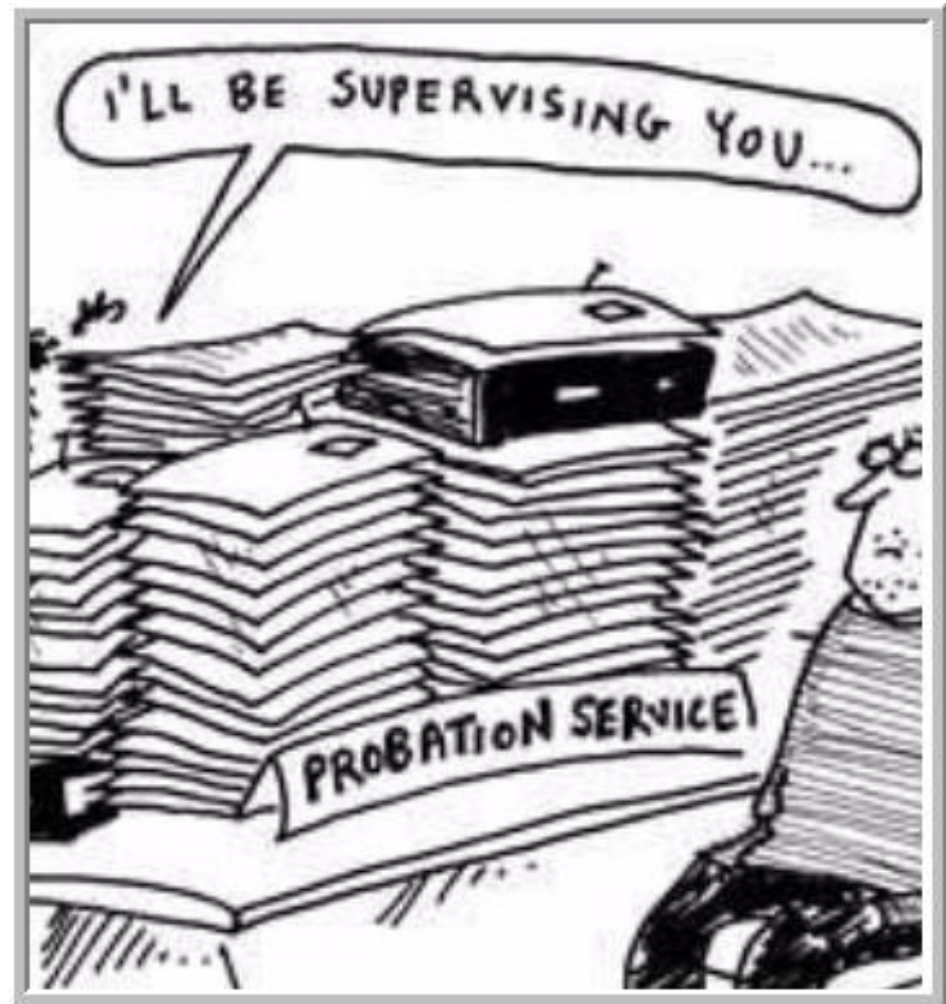

These tools were accurate!

We have a big and growing recidivism problem.

Recidivism ranges from 40% to 75% depending on who creates the statistics.

In the 90s - iMResponsible.com used Compu-Tools on all Idaho inmates and recidivism was approximately 25 -30%.

Let's try these effective solutions again!

Smart Cell Phone
I am what the Client Needs!

Call iMResponsible.com for initial setup (208-853-7410 → David)
(david@imresponsible.com)

iMR.com will review “Walk the Talk” Program elements with him/her

iMR.com will provide TEAM members with 24/7 access to Treatment Task Data

See Sample Report

iMResponsible.com – “Walk the Talk” - Self Managed / Self Monitored Behavior Program

1. Client **“accepts”** rigorous terms of Behavior Modification Contract/Plan
2. **Key TEAM members** are identified for support and case data communications
3. Client is **trained** on Cellular Use of Tracking Software
4. As tasks are completed, iMR.com receives **immediate confirmation**
5. Case data received includes **GPS (longitude/latitude) and address verification (See Below)**
6. Case data received can include **Client Messages (See Below)**
7. **Case data** is available **24/7** – downloadable PDF format or in cvs/text format

Note: iMR.com has clinical partners that provide tele-counseling services

iMR.com can provide UA kits = used with TEAM support
