

WALK THE TALK - FORMS - REPORTS

iMR's principal founder has been in AA recovery since February of 1979. He believes that Walking the principals of this program saved his life. He also thinks more lives have been saved by 12 Step programs than any treatment efforts developed by other entities or programs.

Lack of Accountability is a National disease but there is hope for those who seek - TRUTHS - not an improved bottom line or job security.

INTRODUCTION – RATIONALE:

The tools and processes we provide are accompanied by an expectation that our Clients and the Professionals involved will use them responsibly and as designed. Unfortunately, in today's environments, rules, regulations, emotions, finances, and other factors hinder responsible and accountable task completion. A unique feature of the "Walk the Talk" programs is that **behavior improvement results** come from **responsible CLIENTS** and some **TEAM** members. We hope our experience and knowledge will help those few - who are able to become more responsible and accountable. Honest self-assessment can be difficult and painful = not risked by many.

FOUNDERS EXPERIENCE – FOUR YEARS AS A PEER/MENTOR TO RELEASED INMATES:

I was fortunate to have an inexpensive resource for phone and laptops. (Personal Cost - \$80). Day of Release – Client had the needed communication tools. We, also, always visited a local library. The results were remarkable. All tools listed below were available on the laptop and not one individual felt that the 5-10 minutes it took on each Friday night to complete a *PDF form report* was unreasonable.

FORMS USAGE:

Each form is designed to assist us in preparing and delivering rational facts and communications to others we are working with. Experience shows that the results of delivering objective and unemotional communications are positive and encourage objective and effective solutions.

WEEKLY REPORT – Ten minutes to complete and mail. Show life area status indicators	L I N K S T O E X A M P L E S	WEEKLY REPORT - LSI – 15 minutes to complete and mail. Show life area and LSI indicators
