Our Portal to Improved Behavior

This site is for those who adhere to the principle of individual responsibility in behavioral health and wellness. It is designed to assist those who would like to change destructive behavior patterns and promote general health and wellness by assuming responsibility for positive results. You must [subscribe](#) to use this site, including the following suite of modules.

Account Management
This module is primarily for the organization and includes maintenance functions to create and update related clients as well as designated managers and specific client assignments.

Assessments and Treatment Planning
This module is for managers as well as clients and referral sources needing to complete assessments and treatment planning/contract details. Assessment results are also available to those with proper authorization.

Case Management and Monitoring
This module is primarily for managers and clients who need to enter or view client related information, activity updates and case notes. Client activity reports are available for download in an encrypted PDF format.
